Complete Communication & Security Package

We provide end-to-end systems that combine connectivity, surveillance, access control, and monitoring into one coordinated solution.

Suitable Applications

- Commercial buildings and offices
- Industrial plants and depots
- Warehouses and logistics yards
- Residential apartments and estates
- Schools, hospitals, and institutions
- Hotels, malls, and public facilities

Modular designs - start with critical areas and expand as budgets allow

Typical Deliverables

- Site survey report
- System architecture
- Equipment schedule
- Installation drawings
- Testing and commissioning report
- User training and handover pack

Why Choose Penderm Enterprise LTD

- Engineering-led design from site survey to commissioning.
- Clear BOQ/BOM, drawings, and handover documentation.
- Integrated solutions that reduce multiple contractor interfaces.
- Local technical support, training, and maintenance assistance.
- Scalable designs suitable for future expansion.

Communication Solutions

Reliable communication infrastructure improves operations, response time, and system availability.

Structured cabling: Cat6/Cat6A data, voice outlets, patch panels, and racks.

Fiber optic networks: Backbone cabling, termination, splicing, and testing.

Wireless networks: Indoor/outdoor Wi-Fi coverage planning and deployment.

IP telephony / PABX: Office communication, extensions, and call routing.

Public address systems: Paging, announcements, and emergency communication.

Intercom systems: Gate, reception, and building communication.

Industrial networking: Switches, media converters, and links for PLC/SCADA/BMS.

Fiber Optic Cabling
Briticom

IP Phone / VoIP Yealink

Cybersecurity Platform Schneider Electric

Security Solutions

Protect people, property, inventory, and critical infrastructure with layered security systems.

CCTV surveillance: IP cameras, NVRs, remote viewing, and video storage.

Access control: Card, PIN, biometric readers, locks, and controllers.

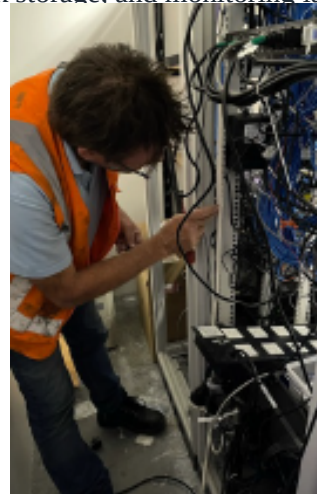

Intrusion alarms: Motion sensors, door contacts, sirens, and alarm panels.

Perimeter security: Fence detection, beam sensors, and yard monitoring.

Gate automation: Barriers, gate motors, loop detectors, and safety accessories.

Visitor management: Reception control, passes, and attendance records.

Control room setup: Displays, workstations, network storage, and monitoring layout.
